RE: Docket #98N-1038

I demand that all foods that are irradiated be correctly, clearly labeled. Call a spade a spade--no cover-ups in double speak.

As a person with a chronic disease it is extremely important to me that I know what in the world I am eating. To me irradiation is absolutely unnecessary: we need to get at the causes of food poisoning, not do a cover-up after the fact and we need to produce and buy more locally so that food is not on-the-road a long time. Furthermore it is dangerous--it causes changes in the food, reduces the nutritional value and in addition it is dangerous to workers having to do the dirty deed of irradiating food. I am concerned not only for myself, but for others and especially for children whose bodies are very vulnerable.

WE ALL HAVE A RIGHT TO KNOW. DO NOT DENY US OUR RIGHT!

Yours sincerely,

A handwritten signature in cursive script that reads "Constance Kozel, RSM". The signature is written in dark ink and is positioned below the typed name.
